<TEXT>I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

I already pay this fee on my home phone bill, and I have a cell phone in my car for emergency use only, I am a senior citizen 82 years old who needs not to be exposed to the dangers on our streets and highways these days without means of communicating.

Under the flat fee proposal you are considering, people who make few or no long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Sincerely Elmer A. Campbell 10650 E.
